ÖLFLEX® CLASSIC 100 300/500V

Application

ÖLFLEX® CLASSIC 100 300/500V cables are colour coded control cables for occasional flexible use and fixed installation for medium mechanical use. They are suitable for use in dry, damp and wet areas and are space-saving due to smaller cable diameters. If using outdoors, observe the indicated temperature range and use with UV protection. They are largely resistant to acids, alkalis and certain oils at room temperature.

ÖLFLEX® CLASSIC 100 300/500V cables are suitable for occasional, non-automated movements. The maximum tensile load is 15 N/mm² of conductor cross-section during installation and operation. Compulsory guidance is not permitted.

Application range: ÖLFLEX® CLASSIC 100 300/500V cables are used as control cable in industrial machinery, plant engineering, in power stations, in heating and air-conditioning systems, etc.

This cable is suitable for torsion application in wind turbines (WTG). The torsional load is limited to applications, as they typically occur in the loop of a wind turbine.

Design

Design based on

EN 50525-2-11 EN 50525-2-51 and IEC 60227-5

Certification EN 13501-6 and EN 50575

Classification of fire behaviour

(article/dimension range see www.lappkabel.com/cpr)

Conductor fine wire strands of bare copper acc. to IEC 60228 resp. EN 60228, class 5

Insulation PVC compound TI2 acc. to EN 50363-3

with increased requirements acc. to Lapp specification

Core identification code acc. to. VDE 0293-1, with or without GN/YE ground conductor

up to 5 cores: acc. to HD 308 S2

from 6 cores: acc. to LAPP ÖLFLEX® color code

Stranding cores are stranded in layers

Outer sheath PVC compound TM2 acc. to EN 50363-4-1

with increased requirements acc. to LAPP specification

colour: silver grey, similar RAL 7001

Electrical properties at 20 °C

Specific volume resistivity > 20 G Ω x cm Nominal voltage U₀/ U: 300 / 500 V Test voltage core/core: 4000 V AC

Mechanical and thermal properties

Minimum bending radius occasional flexing:15 x outer diameter

fixed installation: 4 x outer diameter

Temperature range occasional flexing: -5°C up to +70°C max. conductor temp.

fixed installation: -40°C up to +80°C max. conductor temp.

Torsional stress Torsion movement in wind turbine generators

TW-0 (5000 cycles at ≥+5 °C)
TW-1 (2000 cycles at ≥-20 °C)
±150 °/m at 1 revolution per minute

Flammability flame retardant acc. to IEC 60332-1-2 resp. EN 60332-1-2

Tests acc. to IEC 60811 resp. EN 60811, EN 50395, EN 50396

General requirements These cables are conform to the EU-Directive 2014/35/EU

(Low Voltage Directive).

A part of these cables (see www.lappkabel.com/cpr) are classified in accordance with the EU-Regulation no. 305/2011 (CPR).

Environmental information These cables meet the substance-specific requirements of the EU Directive 2011/65/EU (RoHS).
