Application

ÖLFLEX® CLASSIC 128 CH BK 0.6/1 kV are screened, halogen free, flame retardant power and control cables for occasional flexible use and fixed installation subject to medium mechanical load conditions.

They are also suitable for use in dry or damp areas.

They are suitable for outdoor use if the indicated temperature range is observed.

They are suitable for occasional, non-automated movements. The maximum tensile load is 15 N/mm² of conductor cross-section during installation and operation. Compulsory guidance is not permitted. The screening braid protects against interference from electrical fields.

Application range: Public buildings, airports, railway stations, plant engineering and construction, air conditioning systems and particularly where as well human and animal life as valuable property are exposed to high risk of fire hazards. In the event of a fire minimal toxic and no corrosive gases occur.
